

Wireless Endocavity Ultrasound Scanner

For iOS and Android

Superior Image Quality

We have designed Clarius with image quality in mind. Our scanners produce clear images, so you can always see the details you need to see.

Wireless

Clarius scanners are wireless and connect directly to your smart device. Scan without cords getting in the way.

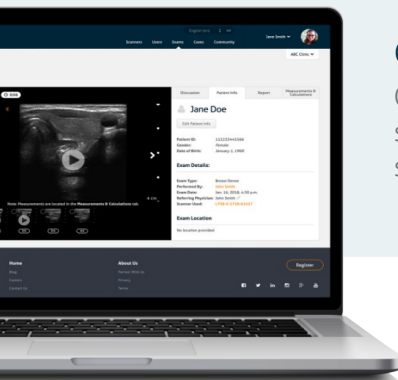

Easy to Clean

The Clarius EC7 supports full sterile enclosure and is fully submersible for easy cleaning.

Compatible with:

- High-level disinfection solutions (e.g. STERRAD)
- Disposable and reusable biopsy guides

Clarius Cloud

Our online exam management system lets you review and share images with colleagues.

“This is modern ultrasound “at its best”: mobile, versatile and network-friendly.”

Prof. Dr. med. Johannes Klein
Lübeck, Schleswig-Holstein, Germany

Easy to Use

Our automatic presets make scanning easier. They optimize imaging settings based on your workflow, so you don't have to make adjustments.

Pre-set Applications

- Early OB
- IVF
- Pelvic

AI-based Measurements

Clarius will automatically calculate follicle measurements for you. Available in late 2018.

Clarius Stand

The Clarius Stand is designed for use in a clinical setting.

- Height and angle adjustable display
- Ergonomic handle to easily move from room to room
- Wire basket to hold supplies
